DINING CHAIR

GUY GOODFELLOW COLLECTION

FINE FABRICS AND WALLPAPERS

Following on from the Carver design, for more conventional dining chair use, this chair was created by removing the arms seen in the original early 19th century, Gothic style chairs.

The scale remains generous, and these chairs work perfectly alongside the Carvers around a dining table, or as a set for more informal kitchen use.

The versatility and beautiful proportions of this chair make it perfect for dining rooms and with its generous scale, it works well for occasional use in halls, reception rooms and bedrooms.
